DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3765

2. Claims 1-17 are provisionally rejected under the judicially created doctrine of double patenting over claims 1-18 of copending Application No. 10/604,283. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: The claims pending in pending application '313 are substantially similar in scope to the claims which pertain to a cut away vest having a retainer system as disclosed by copending application '283.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Art Unit: 3765

Allowable Subject Matter

3. Claim 1 and its dependents would be allowable if rewritten or amended to overcome provisional rejection made under the judicially created doctrine of double patenting, set forth in this Office action. Claim 1 and its dependents are allowable because the prior art does not teach or suggest the recitation therein including a cut away vest shoulder straps with a first connector element, a waist belt having a second connector element in combination a flexible retainer element engaging the first and second connectors that has at least first and second grip members associated therewith.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
